

# Telehandler inlift frame

*Lift Your sheet materials in a safe and easy way*

The Starke Arvid inlift frame is a unique product which is designed to lift board materials with a telescopic handler/fork lift in tight spaces. Place the boards directly on a Lift 8 or EL 8 to quickly and smoothly distribute the boards at the construction site. It's easy to fit the inlift frame to different kinds of board and it's design eliminates damage to boards and reduces waste. The frame is suitable for long forklift forks, and it is locked by means of two transverse steel bars.

## **Advantages of Telehandler Lifting Frame**

Materialsloда 1360 är staplingsbar samt är utrustad med lyftöglor och fyrpartskätting för säker kranmanövrering. Kättingen är kortare i bakänden så att restmaterialet samlas fram till vid lyft. Materialsloдан är anpassningsbar för alla gaffeltyper och med hjälp av kroktornet kan du som användare själv tömma slodan.

- **Efficient flow for lifting sheet materials**
- **Easy to install on various types of materials**
- **Eliminates the risk of damage to the sheet material**
- **Greatly decreases waste**
- **Minimises the risk of workplace injuries**
- **Allows for quick and easy distribution**

## Technical data

Inlift frame:	900	1300
Part number:	70400	70410
Maximum load:	1600 kg	1600 kg
Length:	1030 mm	1030 mm
Height:	800 mm	800 mm
Max board width:	900 mm	1300 mm
Weight:	70 kg	90 kg
