

Waste Skip

The Waste Skips create an efficient worksite through better collection of construction waste. Chains allow them to be crane lifted where space or access is tight. The hinged gate can be lowered to make loading easier and then locked back in position before lifting. Emptying the skip is easy, release the hinged gate locks; put the lifting chain through the tower hook, lift and the skip will tilt and empty.

Technical Specification		
Waste Skip:	1360	2000
Article number:	33200-KPL	33300
Max load:	1500 kg	1500 kg
Width:	1340 mm	1380 mm
Length:	1360 mm	2360 mm
Height:	825 mm	825 mm
Weight:	280 kg	300 kg
